PROFILE

I am a highly skilled and experienced data management professional with a strong background in client data management. I possess advanced expertise in utilizing data analysis tools, such as Tableau, IBM Cognos Analytics and Power BI to streamline processes and produce insightful reports and dashboards. My previous experience within the insurance industry has provided me with a proactive approach to detecting and addressing data issues while compiling accurate and relevant progress and data reports. I excel in managing and reporting on the progress, cost, and benefits of client data maintenance campaigns, while ensuring data integrity and compliance with regulations.

With exceptional communication skills and a commitment to continuous learning, I am dedicated to delivering optimal results and contributing to team effectiveness and operational excellence.

WORK EXPERIENCE

JAN 2019 -
OCT 2022

RAUBEX GROUP LIMITED - RAUBEX (PTY) LTD - RG BROKERS

In 2019 I was transferred to RG Brokers the insurance department for Raubex (Pty) Ltd. We managed over 7 800 Fleet items, and 3 (three) divisions within the group. We started to develop an insurance system that required the client to register fleet claims with the required documentation to assist.

Administrative activities include; To secure systems for efficiency and compliance which are in-line with policies; as well as ensuring accurate and consistent data management and storage. My work also has a direct and strong client interface and communications components.

SEPT 2018

RAUBEX GROUP LIMITED - RAUBEX (PTY) LTD - IT DEPARTMENT (Temporary contract period - 6 months)

During my contract period at Raubex (Pty) Ltd - IT Department, I assisted with the development and implementation of a procurement system.

My role required me to present a sustainable process lifecycle and liaise with providers to assist us with the required information in a timely manner.

I was also actively involved with the purchasing and ordering of Information technology within accordance to our organization strategy.
